Software Engineer (5+ Years) | Expertise in .NET Core, AWS serverless architectures, and scalable system design. Actively exploring the frontier of AI through personal agentic engineering projects, with a strong focus on building scalable web applications.

Skills

- C#, Javascript
- SQL, PostgreSQL, Redis.
- React, Next js
- .NET, AWS, Azure
- Azure DevOps, GitHub, Docker.
- DSA, LLD, HLD

Work history

Associate Staff Engineer

Nagarro, Gurgaon, India

July 2022 - September 2024

- Maintained and supported an AWS serverless API storefront, consistently delivering new features and ensuring platform stability.
- Designed and rolled out an automated tool using AWS SAM that scanned CloudWatch logs to find and safely delete unused Lambda functions, cleaning up our cloud infrastructure.
- Built a zero-data-loss rollback mechanism that could completely restore any mistakenly deleted function in under 5 minutes.

Software Engineer

CGI, Bengaluru, India

April 2021 - July 2022

- Optimized Azure DevOps CI/CD pipelines by installing and configuring secure, self-hosted internal agents, successfully slashing build and release latency by 50%.
- Implemented Enterprise SAML SSO authentication to secure user access across multiple frontend clients.

Associate Software Engineer

Emids, Bangalore

February 2019 - March 2020

- Implemented Repository patterns using Entity Framework to manage employee onboarding data persistence, decoupling business logic and ensuring 100% data consistency across multiple onboarding stages.
- Optimized SQL Server queries and stored procedures, reducing database execution time by 40% .
- Developed backend business logic using ASP.NET and managed server-side rendering with Razor Pages.

Education

B.E in ELECTRONICS AND COMMUNICATION ENGINEERING August 2018
SDMCET, Dharwad, India

Certifications & Awards

- AWS Fundamentals Certification
- APEX Bronze Award – CGI
- Cause for Applause Employee Recognition – Emids
